

IRUG Licenses Summary

Kathleen Bohachek

Last quarter we stopped counting memberships/licenses for the BETA product, RELAP5-3D version 3.0.0. That product is no longer supported. Instead, memberships/licenses for the newest released product series RELAP5-3D version 4.0.3 are counted. Note however, that memberships/licenses for RELAP5-3D version 2.4 are still counted, as that product is still being distributed.

The fourth quarter highlights for international members include another new member joining, six more renewals, raising the total still higher (than last quarter) at 29. The composition of membership goes from 3-to-1 commercial to university, to almost 1-to-1 this quarter. Table 1 all groups of international members with licenses still in force.

Table 1: International IRUG Membership

International	New Members	Renewals	Existing Members	Totals
University	0	1	9	10
Commercial	1	5	12	18
Simulator (RT)	0	0	1	1
Sub-Total	1	6	22	29

Domestically for the second quarter in a row, two new members joined IRUG and had licenses processed. Seven existing members, who were approaching expiration, renewed. Table 2 shows all two groups of domestic members. We now have three more members than last quarter.

Table 2: Domestic IRUG Membership

Domestic	New Members	Renewals	Existing Members	Totals
University	1	3	11	15
Government	0	0	9	9
Commercial	1	3	9	13
Simulator (RT)	0	1	1	2
Sub-Total	2	7	30	39

Total Licenses	3	13	52	68
-----------------------	---	----	----	----

A quick comparison with last quarter shows a net increase of 4 members overall. And that is due to rise next quarter. There are seven memberships still in the processing pipeline. Once these are completed, they will be included in the ranks of Tables 1 and 2 in the fourth quarter report.

Potential New Members	7
