RELAP5-3D Code Release - Summer 2013

The code will be released this summer in advance of the Users Seminar (see below). It will contain many new features that have been reported in recent newsletters and a number of others. Some code features include:

- Variable Gravity to Model Moving Systems   (See 2013 1st quarter newsletter)
- Nodal Kinetics Upgrades   (See 2012 4th quarter newsletter)
- Verification File
- Plotting and Stripping Upgrades
- New Card 1 Options

Auxiliary Support Programs – Summer 2013

Some of the useful RELAP5-3D support programs have been renewed to work with the post-Beta version of RELAP5-3D and the plot file upgrades. These will also be released in advance of the Users Seminar.

- RGUI Station   (See 2013 1st quarter newsletter)
- Pygmalion   (See 2012 4th quarter newsletter)

RELAP5 International Users Seminar (RIUS 2013)

RIUS 2013 will be held in Idaho Falls in September. This year, the meeting offers training in RELAP5-3D usage for those interested. Training takes place the two days precedes the technical and business portion of the seminar.

- Sept. 10-11   RELAP5-3D Training   (http://www.inl.gov/relap5/training2.htm)
- Sept. 12-13   Seminar and Business Meeting   (http://www.inl.gov/relap5/seminar.htm)
