

# ***RELAP5-3D Auxiliary Tools***

**Hope Forsmann**

RELAP5 International Users Seminar

Date: September 12, 2014

[www.inl.gov](http://www.inl.gov)

## ***Introduction: Updates and Upgrades***

- RGUI Station Bug Fixes
- RGUI Station Enhancements Fixes
- RGUI Station Future Efforts

## ***RGUI Bug Fixes***

- Enhanced Error messages
  - Clearer message when option files are not available
  - Configure Window Labels to match content
- Updated default browser location
  - From user\_name/
  - To rguistation.jar
- More uniform file selection browsers

## ***RGUI Enhancements***

- Eliminated the need for .rgui.properties file
  - Automatically identifies current OS
  - Linux/Windows
- Added a stdout window
  - Provides the user with easier access to the screen output
  - Both RELAP and PYGI
  - Optional check box to close the console window

## ***RGUI Future Efforts***

- Add functionality to run batches of problems
  - Test cases
  - Multiple models
- Plotting

# ***Conclusions***

- RGUI Station
  - Bug fixes
  - Enhancements
  - Future Efforts
